

ALEJANDRO TORRES

Montgomery, IL | (630) 488-2301 | talejandro502@gmail.com
<https://www.linkedin.com/in/alejandro-torres-2b2a5a367/>

EDUCATION

Aurora University, Aurora, IL

Dec 2026

Bachelor of Science in Computer Science | GPA: 3.625/4.0

Relevant coursework: Programming Languages, Object Oriented Design and Development, Advanced Web Application Development, Software Testing, Discrete Mathematics, Data Structures and Algorithms, Database Design and Implementation, Linux OS

PROJECTS

AI-Powered Art Curriculum Platform (Django, Django-ninja, Celery, AI APIs)

Jan 2026 - May 2026

- Developed a full-stack RESTful API using Django-ninja and ReactJS, implementing secure user authentication and dynamic content management systems, resulting in a smooth experience for users
- Integrated OpenAI APIs for automated data assessment, designing scalable background workflows to generate personalized user learning paths, leading to complete curriculums being created in less than 90 seconds
- Optimized application performance by implementing asynchronous task processing with Celery and Redis, eliminating frontend latency for heavy compute workloads, saving the user from frozen screens during loading
- Designed and normalized a complex PostgreSQL database schema using Django ORM to track state, progress, and relational entities efficiently, resulting in business rules being followed and protection of user data
- Collaborated in an Agile team environment using Git for version control, participating in code reviews and sprint planning over a 14-week lifecycle, boosting overall productivity by around 25%

Compiler Project (C++)

March 2026 - May 2026

- Developed an end-to-end language processor in C++ that tokenizes, parses, validates, and executes program files written in a custom programming language, resulting in run times of approximately 8ms on average
- Engineered a custom lexical analyzer to scan raw character streams and systematically extract valid lexemes based on specified language grammar rules
- Constructed a syntax analyzer and semantic analysis layer to build syntax representations and enforce structural verification and scope validation
- Implemented an internal execution environment or interpreter backend to evaluate parsed program logic and dynamically handle runtime outputs

WORK EXPERIENCE

Retail Work | Jewel-Osco, Oswego, IL ; Target, Oswego, IL ; WCC Book Store, Sugar Grove, IL October 2019 - March 2026

- Utilized analytical problem-solving to systematically troubleshoot and resolve customer issues under high-pressure conditions, resulting in \$100+ dollar sales being saved
- Managed task prioritization and workflow efficiency, accurately identifying root causes to resolve issues independently or escalate complex cases to management, improving the rate of customer satisfaction
- Honed communication skills through collaboration with peers on assignments, which aided in overall efficiency
- Sharpened the ability to translate surface-level requests into actionable, underlying customer goals

ACTIVITIES

Independent Audio Producer & Solo Musician

May 2022 - Present

- Manage the entire life cycle of multi-track musical projects, driving initiatives from conceptual songwriting to final digital mastering and distribution
- Leverage Digital Audio Workstations for advanced signal processing, mixing, and audio synthesis
- Troubleshoot complex audio hardware chains and software environments, delivering high quality assets

Volunteer | Feed My Starving Children, Aurora, IL

Apr 2016 - Present

- Offered to assist in the restocking of important materials, resulting in little downtime and more meals packed
